

InvisiPac[®]

TANK-FREE[™] HOT MELT DELIVERY SYSTEM

FOR CASE + CARTON PACKAGING

PROVEN QUALITY. LEADING TECHNOLOGY.

The most reliable, most profitable hot melt system

Confidence is a reliable seal. Pop-opens, clogged nozzles, unplanned downtime, increasing adhesive costs. If you're using tank-based hot melt delivery systems for your case & carton packaging line, it's likely that you've lost productivity—and a good amount of sleep—from these common problems.

At Graco, we understand that continued downtime or the smallest defect in a case or carton sealing application can result in added costs or returned goods - leading to significant profit loss. This understanding along with our 90+ years of developing revolutionary fluid dispense systems, has fueled our efforts to develop the most reliable hot melt glue systems available today to make sure packaging operations around the world realize a healthy bottom line and increased confidence through ***consistent sealing and increased uptime.***

InvisiPac®
TANK-FREE™ HOT MELT DELIVERY SYSTEM

We're committed to finding you the **right solution.**

Keep your lines running + drive more profitability

With InvisiPac, you'll experience **far less downtime** and **produce more** with a better seal. You'll use **far less adhesive** and be able to drastically **reduce your spare parts inventory**. All delivering more profits to your bottom line. And have the data to prove it!

How? The difference is the technology. **No tank. Period.**

The innovative design, with **70% larger melting surface** than the closest competitor, melts your glue fast, and dispenses it immediately, controlling a consistent viscosity and dispensing exactly what is needed, down to the hundredth of a gram.

Increase your productivity.

Save more money.

Drive efficiencies with data.

Unmatched reliability.

Why InvisiPac is different...and better

Tank based systems have long heat up times, causing operators to leave systems on exposing the adhesive to extended periods of heat. This degrades material quality and produces time consuming, plug-forming char. Tank based systems are also prone to thermal shock from large amounts of adhesive being dumped into the tank during refill. This causes temperature fluctuation, changing glue viscosity, causing inconsistencies in dispensing and uncontrolled glue waste.

With InvisiPac:

- 1 An ultrasonic sensor monitors glue in the melting chamber automatically adding glue.
- 2 With its efficient heat transfer design, glue melts quickly and maintains a consistent temperature.
- 3 Less time your glue cooks at high temperature means less char, less maintenance, less degradation and more uptime.

More choices

You can use low-grade adhesives when it makes sense or high-grade adhesives to ensure premium performance.

3

The Tank-Free™ difference

Tank & Tank-Less Systems ▶

- Heat to operating temperature slowly due to low melting surface area
- Keep large quantities of adhesive at high temperatures
- Allow degradation of adhesive integrity
- Create char and cause plugged nozzle
- Exposure to burn hazards

Tankless

Tank

InvisiPac's Tank-Free System ▶

- Heats to operating temperature quickly due to high melting surface area
- Maintains continuous flow of heated-on-demand adhesive
- Safeguards adhesive integrity
- Eliminates plugged nozzles by eliminating adhesive char
- Eliminates exposure to burn hazards

Tank-Free

How InvisiPac works for you

1

Automatic Feed System with patented technology has a self-learning feed algorithm that takes the guess work out of filling your hot melt system. No more tuning or calibrating your fill hoping you get the right frequency.

3

Advanced Display Module provides an accurate control of the complete process (temperature, adhesive usage, dispense shot sizes, performance notifications).

2

Adhesive Melter has innovative melting chambers that melt adhesive quickly and dispenses it immediately, eliminating adhesive char build up and maintains integrity of adhesive by not letting it sit at high temperatures for long periods of time.

4

Superior heated hose design is char resistant, reducing char buildup, resulting in more uptime and lower maintenance costs.

5

Plug-Free Applicators have a free-flow manifold design and integrated module filtering that eliminates nozzle plugs and can operate up to 10,000 cycles per minute.

The hot melt system that runs reliably, unnoticed and invisible.

The clear choice

Increase your productivity.

Eliminate Downtime

- No char, no nozzle plugs.
- No more time consuming tank scraping product maintenance

Parts Last Longer

- Less plastic and built to last.
- 10+ years pump lifetime.
- 500 million + gun cycles.

Improved Operator Safety

- Design eliminates burn hazard risks and keeps your employees safe.

Save more money.

Guaranteed Savings

- Use less material.
- Reduce maintenance and spare parts.

Better Seal

- Reduce costly pop-opens by having glue do what it's suppose to do by not cooking it away and producing char.

Use Less Energy

- Heats up in < 10 minutes and has an auto shut off after 1 hour idle time.

Drive efficiencies with data.

Know Your Glue Usage

- Measure the right amount of glue, control a consistent bead and track your usage grams per case, so you can put exactly what you need where you need it... and prove it.

Real Time Feedback

- Alerts you when material usage is out of desired range and receive performance notifications on your lines, anywhere, anytime with the ability to leverage data to cut additional costs.

ADHESIVE USAGE LINE REPORT

HM25C: Compact reliability, significant profitability

InvisiPac HM25C

New design for compact solutions

- Easily integrates into your existing packaging lines.
- 25 lb/hour (11.3 kg/hour) melt rate.
- Light tower alerts when material usage is out of desired range.
- 10 minute start up.
- Auto shut-off capability.
- Auto-tuning fill adjusts over time as conditions change reducing need for calibration.

InvisiPac Integrated Vacuum Feed

Leading technology

No thermal shocking

- Continuous supply of adhesive
- Level sensor maintains consistent melt rate
- Promotes consistent material usage

Reliable performance

- Minimizes unplanned maintenance/shutdowns
- Removes the human factor

Safety

- No exposure to molten hot melt adhesive

1 Shaker built into vacuum

Reduces air consumption by eliminating the need for an external shaker

2 Feeds from center of hopper

Ensures adhesive does not build up on one side

3 Vibration arms

Breaks up clumps and reduces adhesive bridging

4 Fully enclosed hopper

Keeps adhesive free of debris and contaminants

5 Simple installation

Push to connect air line from InvisiPac system

Quick disconnect vacuum hose

Our feed system employs the Venturi effect*

*This is the reduction in pressure that results when pellets flows through a constricted section of a pipe, and their velocity must increase as it passes through a constriction in accordance with the principle of mass continuity.

Maintain consistent temperature

Superior heated hose design

Graco's char-resistant hose is designed to reduce adhesive char buildup, resulting in more uptime and lower maintenance costs. An additional silicone layer promotes even heating, eliminating hot and cold spots that cause char and skin formation

- Available in many lengths for easy installation
- Available in waterwash or standard platforms
- InvisiPac waterwash hoses for food-safe packaging operations are Rated to IPX6, an international standard for performance in waterwash applications

- ① *Built in over-temperature safety interlock*
- ② *Silicone insulating layer*
- ③ *Up to temperature in less than 10 minutes*

InvisiPac Plug-Free Applicators

Hassle-free operation

Eliminate downtime due to plugged nozzles.

With the InvisiPac Plug-Free™ Hot Melt Adhesive Applicators, you'll experience a new era in hassle-free operation. With their innovative free-flow manifold design and integrated module filtering – you can eliminate nozzle plugs.

Configurable

- Design options easily configures to meet application needs
- Can hook up to any existing hot melt systems for better control

Module Filter

- Design protects ball and seat from debris and char
- Eliminates nozzle plugging when used with InvisiPac System

Manifold

- Manifold filter traps debris and char so it's removed when you replace the filter
- Manifold filter is included in a heated zone, eliminating cold spots and ensuring consistent adhesive application
- Reaches operating temperature in less than 10 minutes

Solenoid

- Graco-engineered for optimal control
- Designed to withstand high speed, high temperature operation
- Lasts over 5 times longer than the leading competitor

Drive efficiencies with data

With InvisiPac, you can track material usage and other production events

- USB download of operating data, errors and event history
- Easily graph your adhesive consumption to track cost per unit, saving you money and ensuring quality
- Quantitatively analyze machine performance to improve preventative maintenance and reduce downtime
- Receive alerts when material usage is out of desired range and performance notifications on your lines.

“In the first 90 days, we’ve had zero errors and have gone from using 30 pounds of adhesive each day to nine pounds.”

— PLANT MANAGER, WORLDWIDE MEAT PROCESSOR

- Result:**
- Less adhesive usage
 - Less rework
 - Less product returns due to pop-opens
 - Equals more to your bottom line

InvisiPac Pattern Control System

Increase productivity

Fast setup, easy programming, pattern storage – it all adds up to increased productivity with the flexibility to adapt when you need to.

Easy pattern setup

- See pattern definitions all on one page for a comprehensive view
- Eliminate the guesswork of pattern setup with on-screen pattern preview
- Copy, delete or name patterns so you can change quickly and keep your line running
- Clone one gun sequence to another when all you need is to repeat the job
- Save time by inserting or deleting beads without editing the rest of the pattern

Variable line speed compensation

- Match adhesive output with line speed – put down less at slow speeds and more at high speeds – the right amount when and where you want it

Stitching

- Save on adhesive consumption by changing solid beads to stitched beads
- Easily stitch individual beads or the entire pattern
- Turn stitching on or off with the push of a button
- Document the savings by integrating with your InvisiPac Hot Melt Delivery System

Operating modes

- Time-based – for those cases where all you need is simple pattern control
- Distance-based at a fixed line speed or with an encoder – for when you need precise control or when you want to adjust to changing line speeds
- Not sure? Switch between modes without changing the program!

— NORTH AMERICAN KITTED CABINET MANUFACTURER

“50% glue savings is awesome and programming patterns is unbelievably easy.”

Fast. Easy. Productive.

The smart solution

The data to make real-time decisions – wherever you are.

With LineSite, you can track InvisiPac machines on the plant floor in real-time from your smart phone, tablet or computer, and use the data as a powerful business tool to cut costs.

Are your lines running? Could they be more efficient?
How much hot melt is being used in one hour? One day? One week?
Should you be considering simple preventative maintenance?

Choose the option that's right for your business.

Machines on Plant Floor

Control portal access through your local network

Access portal through a stand alone PC

Allow controlled access for Technical Support

Stay in the know

LineSite puts critical information at your fingertips.

- Check temperatures and review critical performance metrics
- Receive email alerts for system events or alarms
- See how much adhesive each line is using
- Monitor machine diagnostics and prevent issues from causing you downtime
- Respond instantaneously to potential faults and diagnose them remotely
- Review system operating data in an intuitive, graphical format

Log in to your individualized portal for the tools to keep your line running and the flexibility to make the choice that's right for your business.

Knowledge at fingertips. ▶

- Know what your lines are doing.
- Track what lines are active.
- View daily productivity.

Adhesive Usage Dashboard

Peace of mind. ▶

- Know you are applying the right amount of adhesive per package.
- Receive e-mail notifications when any system change occurs.

Adhesive Per Box Report

Save money. ▶

- Monitor adhesive usage and consumption over time to spot trends.
- Diagnose potential issues faster ultimately improving efficiency of your packaging line.

Total Adhesive Usage

Graco has you covered.

Unmatched Quality.

Our focus on continued innovation keeps Graco Fluid Automation at the forefront of fluid handling technology. We typically reinvest three times the industry average into research and development. Our mission is to provide customers with products that result in the **lowest total cost of ownership** while maximizing product quality and business success.

Global Presence.

With facilities located in Europe, Asia Pacific and the United States, Graco provides a personalized, **end-to-end partnership experience**. Our engineers will lead the solution planning, testing and refining of your solution in our regional labs to ultimately overseeing the product installation process.

Global Support.

After installation, you'll receive **24/7 in-person support** from our worldwide distribution network of trained and certified distributors who offer relevant experience, product knowledge and responsive service to all our customers.

There is no better reassurance than Graco technology, product innovation and the people committed to helping you succeed all day, every day.
